e-Breakfast with... Minimal Processing Technologies

10:00

- Welcome and introduction - Ice-breaking questions

10:10

- Eduardo Puértolas - Researcher

AZTI is a Spanish technological center dedicated to research and innovation, primarily in marine and food sectors. It aims to promote sustainability through scientific advancements and technological solutions.

10:20

- Tuija Sarlin- Senior Scientist of Process Microbiology and Food Safety

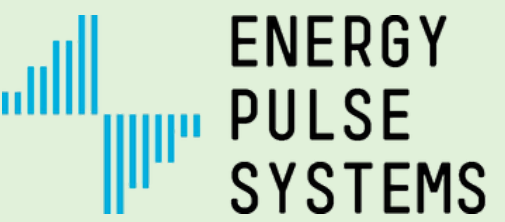

VTT is a research and development organization focused on technology and innovation, specializing in areas such as sustainability, digitalization, and energy transition. It provides advanced solutions for various sectors, collaborating with companies and governments to drive growth and global competitiveness.

10:30

- Mafalda Aguiar - R&G Engineer at Energy Pulse Systems

Energy Pulse Systems is a Portuguese startup that focuses on developing innovative energy solutions, primarily for energy storage and optimization. Their technology aims to enhance energy efficiency and support the transition to sustainable, renewable energy sources.

10:40

- Q&A and networking discussion

10:55

- Closure & Wrap Up

Co-funded by the
European Union
